DETAILED ACTION

1. This application is in condition for allowance except for the following formal matters:

- Figures 1-6 must be labeled "Conventional Art" or "Prior Art", applicant has described said figures in the specification as conventional.
- The reference characters such as a, b, V7 must be defined.
- The equations must be numbered.

Prosecution on the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

A shortened statutory period for reply to this action is set to expire **TWO MONTHS** from the mailing date of this letter.

2. The following is an examiner's statement of reasons for allowance: The prior art made of record does not disclose a method for reconstructing motor phase currents using the steps of modifying PWM control signals supplied to an inverter switches near sector boundaries to provide an interval where a DC current may be sampled and calculating motor phase current based on the sampled currents. Furthermore, the prior art does not teach a space vector control apparatus including a processor for producing drive signals for an inverter, wherein said processor modifies a PWM cycle of the drive control signal when a reference voltage vector is near a state vector boundary and derives motor phase currents based on a current feedback signal.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably

accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
